

Hydrafacial Treatment

How It Works

A HydraFacial is administered by a trained esthetician or other medical professional using a proprietary HydraFacial machine. This specialized machine uses a spiral-shaped suction tip to gently extract dead skin cells while simultaneously applying nutrient-rich serum deep into your pores.

How to Prepare

There are no special steps to take to prepare for your treatment. All you have to do is choose a time to come in for your session!

What to Expect

We'll review your goals and your custom plan. Next, we'll proceed with the type of HydraFacial that is right for your skin concerns. We'll use patented technology to remove dead skin cells, extract debris from the pores using vacuum-powered extraction, and pump hydrating nutrients into your skin. Depending on your goals, we might use LED light therapy to reduce signs of aging, blue light therapy to reduce acne or apply other boosters and processes to attain the desired result. It is an extremely gentle process and is quite enjoyable and relaxing.

Depending on the specific HydraFacial you choose, the process takes 45 to 90 minutes.

After Your Session

You'll be able to return to your normal activities and even wear makeup right after your HydraFacial treatment.

Results & Maintenance

HydraFacials are known for their immediate, long-lasting results. However, some individuals opt for maintenance treatments a few times a year to keep their skin radiant.

ENHANCEMENTS

ADD LED LIGHT THERAPY..... \$20

RED light therapy is a therapeutic technique that uses low-level wavelengths of light to treat skin issues such as any anti-aging concerns, wrinkles, scars, and redness.

BLUE light therapy is a noninvasive treatment for acne that uses light to kill certain bacteria on the skin.

ADD LYMPHATIC DRAINAGE..... \$25

Soothing and relaxing massage using gentle yet effective brushing motions with suction to reduce puffiness around the eyes, neck, and face.

ADD DERMAPLANING..... \$35

Dermaplaning is a method of exfoliation that uses a surgical blade to remove the upper layer of dead skin cells as well as remove vellus hair ("peach fuzz") on the face. It leaves the skin smooth and helps makeup look more flawless.
